#### The Canadian Satellite Design Challenge: Building Future Space Capability in Canada

#### Presentation to the 1st Symposium on Space Educational Activities Dec., 2015

**Larry Reeves** 

President, Canadian Satellite Design Challenge Management Society

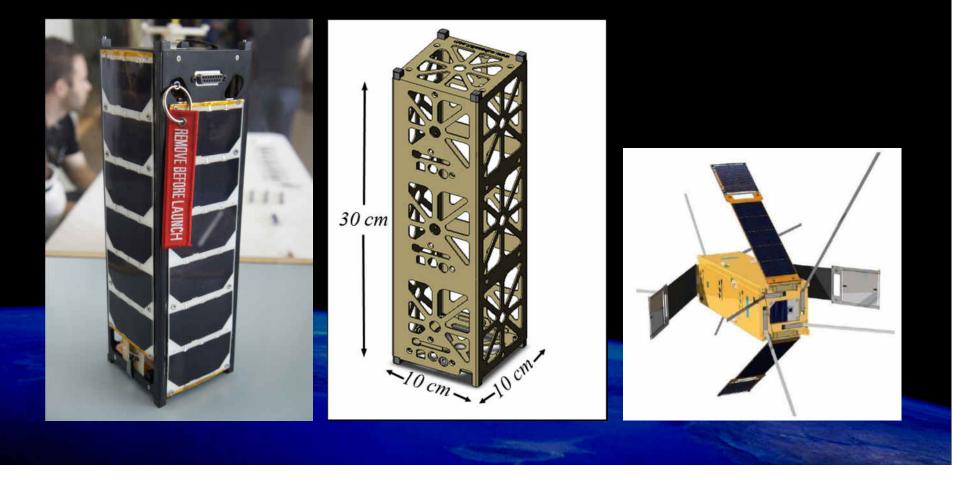

**Chantal Dubois** 

Director of Business & Outreach,

University of Manitoba Space Applications and Technology Society (UMSATS)

## What is the Canadian Satellite Design Challenge?

The Canadian Satellite Design Challenge (CSDC) is a Canada-wide competition for teams of university students (undergraduate and graduate) to design and build a 3U cubesat, with the goal of launching the winning satellite.

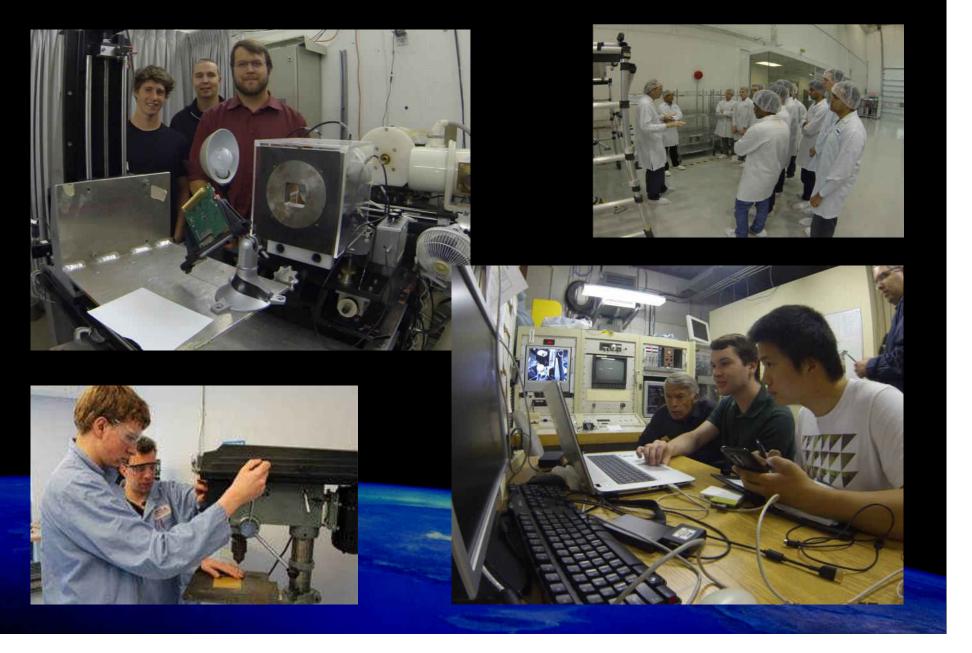

## **CSDC Key Benefits to Students**

- It's more like the real world!
  - Teams are necessarily multi-disciplinary
  - Competition proceeds like a real space mission
    - Customer/Contractor, schedule & milestones, documentation
  - Comprehensive Critical Design Review
- Hands-on learning/mentoring opportunities
  - Professional visits to space companies
  - Clean-room and radiation testing workshops
  - Vibration testing at Canada's national spacecraft test facility
- Educational Outreach
  - Inspire younger students who will follow them

## Mentorship & Hands-on Experience

# Mentorship & Hands-on Experience

## Workshops at Canadian Space Companies

## **Spacecraft Environmental Testing**

## International Experience & Opportunities

CSDC has generated >40 presentations for Canadian & International Conferences.

# CSDC Participants at ISU

#### **Educational Outreach**

- Inspire pre-university students to pursue education & careers in science & engineering.
- Highlight the benefits and importance of satellites and space to Canada.
- Help CSDC participants become better presenters!

#### <u>Summary from 2½CSDC Offerings:</u>

- The CSDC has given students valuable educational content through "hands-on" experience, and knowledge transfer through mentorship, collaboration, and reviews.
  - Makes more knowledgeable scientists, engineers, and managers for entry-level positions in Canada's space marketplace
- A lack of prior spacecraft mission experience is NOT a barrier to successful participation.
  - Students' incredible energy, ability, and dedication make lofty goals achievable.

CSDC participants have world-class abilities!
