Contact: summerschool@unipd.it
Application by March 20th 2025

The Summer School in SPACE ETHICS will equip participants with the knowledge and critical thinking skills to address the ethical challenges posed by humanity's increasing presence in space.

This programme is ideal for Bachelor's, Masters and PhD students who want to shape the future of space exploration in a thoughtful and responsible manner. Core topics covered in the course include applied ethics, space debris, dual-use of space technologies, space settlement, and large constellations of satellites. A series of collaborative tasks, field trips and social activities will provide immersive experiences with Italy's scientific history and future university opportunities:

- Group work and final presentations
- 2-day trip to the Astronomical Observatory on the Asiago Plateau, with guided astronomical observation
- Visits to historical sites related to Galileo Galilei
- Networking events
